

# Revenue Calendar - Display

- Description
- Header
- Booking Status
- Accommodations column
- Cells
- History of changes

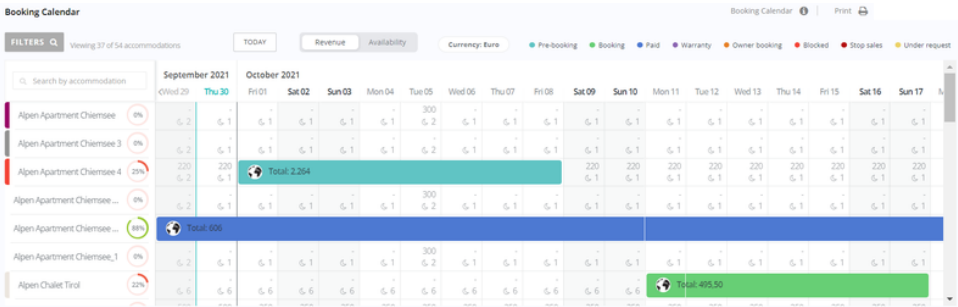

## Description

The new Revenue Calendar shows bookings differently than the Booking Calendar because they each have different functions.

The Revenue Calendar should be thought as occupied nights vs. free nights.

Cell in which a booking is displayed = occupied night.

Empty cell = Night available for sale.

## Header

Today Button	Switch	Currency
<div>TODAY</div>	<div>RevenueAvailability</div> <div>RevenueAvailability</div>	<div>Currency: Euro</div>
By clicking on this button, the Revenue Calendar will start on today's date (useful if you search for a specific date and then want to go back to today's date)	With this switch you can easily go back and forth between the Booking calendar and the Revenue Calendar.	This will show the currency in which the company operates.

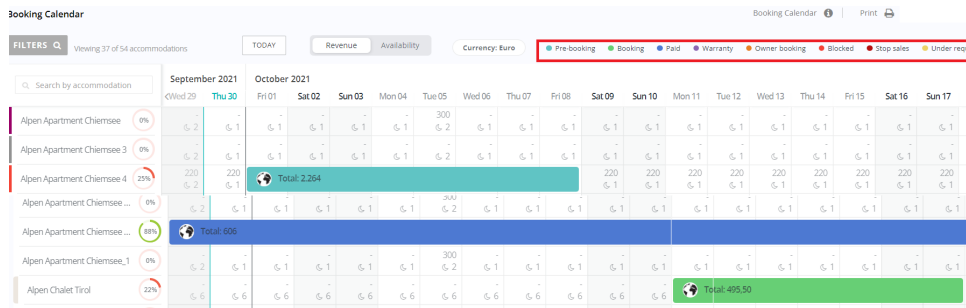

## Booking Status

Content in this section

Related content

Content by label

There is no content with the specified labels

The booking status colour can't be configured in the *Revenue Calendar*. To change these colours you must use the existing function in the *Booking Calendar*.

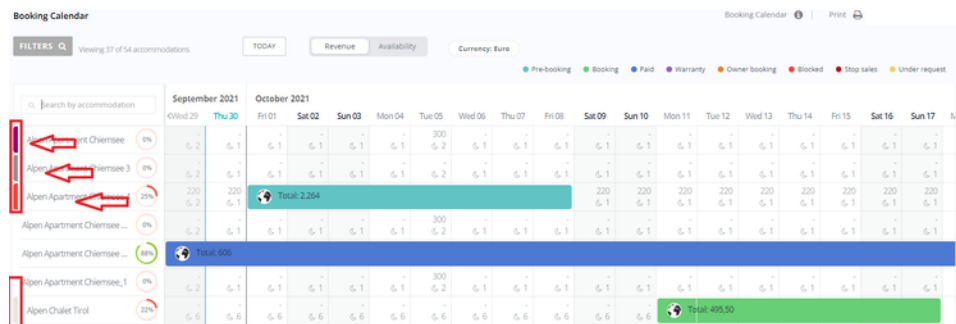

Discover how to change the booking status colours in the Booking Calendar [HERE](#)

## Accommodations column

The Accommodations column has a search bar in order for you to find accommodations by name

It is also possible to distinguish between the colours of the different categories (as in the Booking Calendar)

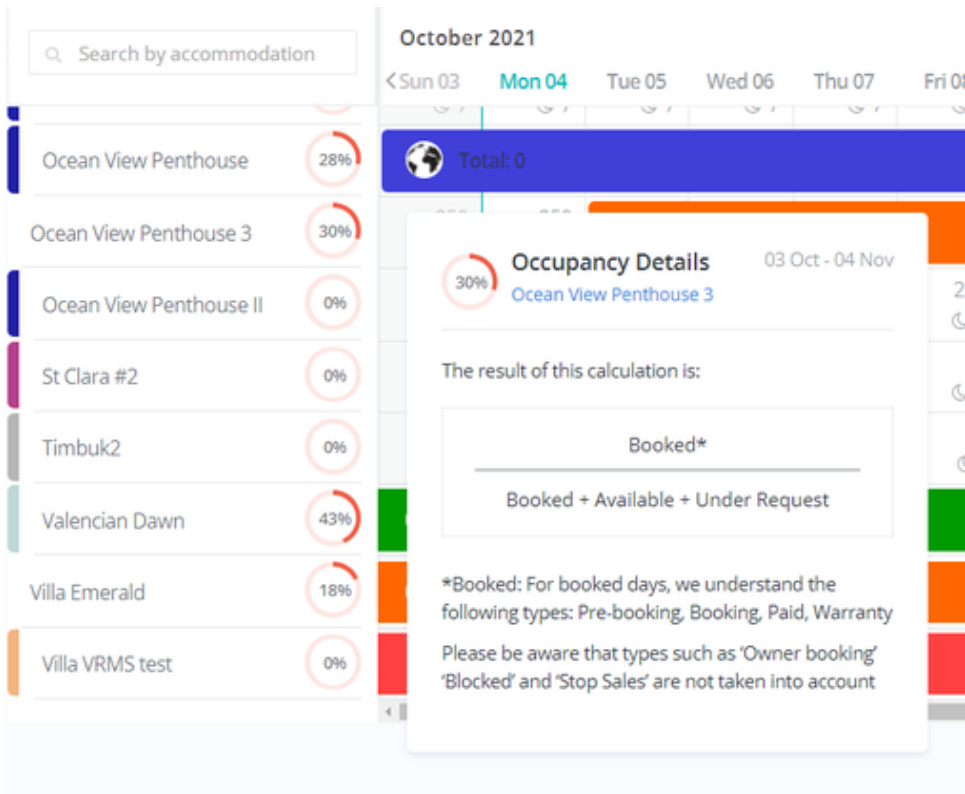

These categories can't be created or assigned from the Revenue Calendar.

To create new categories or assign them to certain accommodations you must go to the booking calendar

[Click here](#) to see how to create categories for internal use in the calendars.

## Graph: Occupancy rate

To the right of the accommodation name, you can see the occupancy rate of that particular accommodation. By left-clicking on the graph, additional information of interest is displayed:

Dates of the period taken into account for the calculation of this rate (month in view).

Name of the accommodation in question

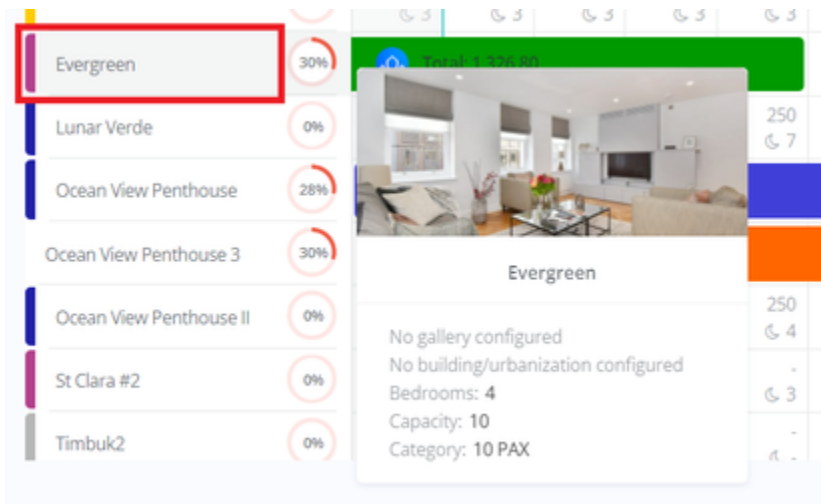

Explanation of the calculation as well as the statuses taken into account for this calculation.

Infographic of the colors:

- **Red** from 0% to 50% inclusive
- **Orange** from 50.01% to 70.00% inclusive
- **Green** from 70.01% to 100% inclusive

#### Left click on accommodation name

When you left click on the name of the accommodation this panel appears:

In this panel there are 3 links:

- Clicking on the photo or accommodation name opens accommodation details.

- Clicking on the photo gallery name opens the photo gallery details.

#### Right click on the accommodation name

## History of changes

You will find the **Change History** inside the [configuration panel](#) so you will know which user made recent changes to the rates or occupation rules.

The menu opens up to display the last three changes with the user, the entity modified and the time /date.

The screenshot shows a hotel management system interface. The main area displays a calendar for November 2021 with various accommodations listed. A sidebar on the right provides details for a selected accommodation, 'Elegante Holzhütte am Titisee'. It shows a rate of 230.00 and an occupancy rule of 5 days. A 'Change History' section at the bottom right shows updates made by 'Lisa Ebner' on 03 Nov 2021.

**i** If the change has been made by **Pricelabs** it will also appear.

## Change History

- PriceLabs** 19 Sep 2021  
Updated the Occupancy rule
- PriceLabs** 19 Sep 2021  
Updated the daily rate
- PriceLabs** 18 Sep 2021  
Updated the Occupancy rule

### NEW

So that you can easily see which properties are connected to one of our partners in your Revenue calendar, when you hover the mouse over the accommodation, the logo of the integrated partner will be displayed.

When you click on the logo a message will appear indicating that the property is connected to a Revenue Management partner and you can click on the link that will take you directly to the login page of the application.

The screenshot shows a revenue calendar with a list of properties and their revenue percentages. A tooltip is displayed over the 'Connected application' link, indicating that rates are automatically refreshed once a day from Pricelabs.

Clicking on a rate will also display the same message. Again you can click on the link to go to the login page of the application or click on "understood" to make the notice disappear.

The screenshot displays the 'Revenue Calendar' for 'Bronxdale Av - Bronx'. On the left is a calendar grid with dates and rates. The central panel has a 'Configure' button and an 'Edit mode' toggle. The right panel shows details for 'Rate 16 2022 - 18 2022' with a rate of 200 and an occupancy rule. A red box highlights a notification at the bottom of the central panel that says 'Connected application' and 'Rates are automatically refreshed once a day from WappConnect it'. Below this notification is an 'understood' link. A 'NEXT' button is located at the bottom right of the interface.

The Revenue Calendar is not designed to handle bookings and therefore no action can be taken on them from this calendar.

To perform actions on bookings, you must go to Bookings Calendar.

#### How do I activate the Revenue Calendar?

If you still do not see it in your account and would like to have this new feature in your Avantio VRMS, please do not hesitate to contact your Account Manager in our Partner Success department directly by email: [ps@avantio.com](mailto:ps@avantio.com)
